

RSE 4MM

DESCRIPTION

RSE 4MM media is activated carbon cylinders (pellets) with a well-developed macropore and micropore structure allowing for uniformity in size and wide range of absorbent retention. RSE 4MM has excellent absorption of organic contaminants with minimal breakage.

SPECIFICATIONS

Shape		Cylinder
Size pellets	mm	4.0 x 6.0
Bulk Density	lb/ft ³	28-32 (+/-5%)
Hardness min	%	95
Iodine (minimum)	mg/g	1000
CCl ₄	%	60

APPLICATION GUIDELINES

Typical air velocity	ft/s	0.9-8.2
Relative air humidity	%	10-95
Temperature	F	4-125
Performance	%	99.5

RECOMMENDED FOR

- Volatile organic compounds
